I often have them help me with the Sunday Children. Those intended is coming to school now, And we hope that we will soon be able to send out our first missionaries. My girls have grown so studious that it is a real pleasure to teach them, I awarded four prizes last quarter for the greatest number of head marks and Reading, Our new Home is so cheerful, and all the rooms have such an air of comfort, our hearts go out in thankfulness to all the dear unknown friends to whose loving gifts we have proved so much indebted for our Comforts. The words of our Heavenly Father have been laid very clearly upon our hearts [illegible] Christ & sing for ministry [illegible] Lord Christ of Israel's

Dear Mrs Hacket

I have just rec'd your letter of Nov. 19th, and will send a short report of my last quarter, that you may know something of our affairs, and be more & more interested in this our school. The first Monday we left with thirty two pupils, have now a roll call of over fifty. The young ones are coming faster now and getting down to the Primer. I find the work much harder than it did me years ago, and my interest in the cause increases with every day of my life here. I understand Mr Dean's children much better

have learned [illegible],
firmness, and patience are necessary
qualifications. My greatest discourage-
ment, and I might say the only one
connected with my department is
tardiness upon the part of the day
scholars. I have tried to impress
upon the parents their responsibility
in the matter, but I see little
improvement as yet. I try to begin
promptly at nine in the morning.
Mrs. McFarland always has her
large family on hand promptly
on all occasions, but it will take
time, education and much
prayer before my school is all I
should desire in point of
punctuality. Indeed nothing short
of an industrial school for our
boys, with good family training
and Christian influences, can
elevate and enable them
to keep pace with the [illegible]

Eight gentlemen (one their many friends
Caesar Jones to Richmond) called
upon our Hero and during the
day they complimented us upon our
success, and were much gratified
at the advancement of the cause,
and intended to do such a thing
in other parts of the
Northern states. Many delegates
so much have been done
Many people do admit that our
principles are true, but if ever they
should ever get an opportunity
send out many Christian teachers
to other tribes. Tell the Chief
and the Head of influence, he made
a very acceptable interpreter, I took
leave take charge of the church the
other day, which I called a meeting
the church all the members except
three of her own, I think she will
write a letter through Brother
Mrs. Daniel about the change
